

# **RAPID VARIO-FS**

# Metal separator for free-fall applications

- Detects and separates magnetic and non-magnetic metal contamination, even when enclosed in product
- Reduces expensive machinery failure and minimises production downtime
- Ensures product quality
- Prevents customer complaints
- Break even within a very short period of time

- Separation unit and product-contacting metal parts completely made of stainless steel 1.4301 (AISI 304))
- Low installation height; the metal separator can be easily fitted into existing pipeline systems
- Separated detection and separation units:
  -Free-fall height can be individually adjusted on site
  \*Position of waste reject unit can be turned to match position of collecting tray
- Standard Jacobs adaptors for inlet and outlet ensure quick, hassle-free installation
- Auto-Set (auto-teach function) or manual product compensation (no fixed setting) for improved adaptation to the intrinsic conductivity of the product to be inspected
- Pre-installed parameters for simplified operation
- Enhanced signal-to-noise-ratio minimises electromagnetic pollution and vibrations

Installation example: Metal separator RAPID VARIO-FS used for the quality control of PET regenerate. (old version)

### **Scope of delivery:**

- Metal separator with separated detection and separation units (mounted via standard Jacobs adaptors)
- Control Unit PRIMUS+

#### **Options/Accessories:**

- Audible and visual alarm systems
- Feed hopper and filler inlet
- · Digital incident counter
- Air pressure monitor
- · Magnet system to remove Fe contaminants
- High temperature resistant
- Special design for abrasive bulk goods
- UL/CSA Certification
- · Removable control unit
- ATEX design

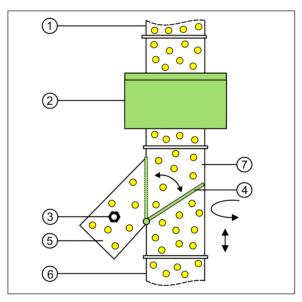

# **Product Description:**

The RAPID VARIO-FS metal separator is used to inspect bulk goods under free-fall conditions. It detects all magnetic and non-magnetic metal contaminations (steel, stainless steel, aluminium) — even when enclosed in the product. Metal contaminations are rejected through the "Quick Flap" reject unit.

The RAPID VARIO-FS is used mainly in industries with low hygiene applications.

# **Function Chart:**

1) Infeed 2) D 4) Separation flap

2) Detection coil

3) Metal contamination 6) Material outlet

4) Separation flap 5) Waste rejection 7) Separation unit (turnable, removable)

## **Typical Application Areas:**

- Plastics industry, In-house recycling
- Recycling industry
- Wood industry

- · Chemical industry
- Food industry
- · Feedingstuff industry

#### **Application:**

- Machinery protection for extruders, blow moulding machines, fine grinding mills, after dosing (rotary valve, vibratory feed chutes)
- Quality control e.g. for final inspection of outgoing goods, granulate, reclaim, bagging stations, dryers and packing stations
